

**Package** com.mapmyjourney.backend.controller

## Class UserController

java.lang.Object<sup>↗</sup>  
com.mapmyjourney.backend.controller.UserController

```
@RestController
@RequestMapping("/users")
public class UserController
extends Object↗
```

Controlador REST para gestionar usuarios.

### Constructor Summary

| Constructors                  |
|-------------------------------|
| Constructor                   |
| Description                   |
| <code>UserController()</code> |

### Method Summary

| All Methods   | Instance Methods | Concrete Methods |
|---|------------------|------------------|
| Modifier and Type   |                  |                  |
| Method  |                  |                  |
| Description   |                  |                  |
| org.springframework.http.ResponseEntity<Void <sup>↗</sup> ><br><code>deleteUser(Long<sup>↗</sup> userId)</code><br>7.                           |                  |                  |
| org.springframework.http.ResponseEntity<UserDTO><br><code>getUserByEmail(String<sup>↗</sup> email)</code><br>4.                                 |                  |                  |
| org.springframework.http.ResponseEntity<UserDTO><br><code>getUserById(Long<sup>↗</sup> userId)</code><br>3.                                     |                  |                  |
| org.springframework.http.ResponseEntity<LoginResponseDTO><br><code>login(LoginRequestDTO request)</code><br>2.                                  |                  |                  |
| org.springframework.http.ResponseEntity<LoginResponseDTO><br><code>registerUser(@Valid UserCreateRequestDTO request)</code><br>1.               |                  |                  |
| org.springframework.http.ResponseEntity<UserDTO><br><code>updateUser(Long<sup>↗</sup> userId, @Valid UserCreateRequestDTO request)</code><br>5. |                  |                  |
| org.springframework.http.ResponseEntity<UserDTO><br><code>updateUserProfile(Long<sup>↗</sup> userId, UserUpdateRequestDTO request)</code><br>6. |                  |                  |

## Constructor Details

### UserController

```
public UserController()
```

## Method Details

### registerUser

```
@PostMapping("/register")
@CrossOrigin(origins={"https://mapmyjourney-
4w93.onrender.com","http://localhost:4200","http://localhost:3000"})
public org.springframework.http.ResponseEntity<LoginResponseDTO> registerUser
(@Valid @RequestBody
 @Valid UserCreateRequestDTO request)
```

1. Registra un nuevo usuario. POST /api/users/register

### login

```
@PostMapping("/login")
public org.springframework.http.ResponseEntity<LoginResponseDTO> login(@RequestBody
                                                                    LoginRequestDTO request)
```

2. Inicia sesión con email y contraseña. POST /api/users/login

### getUserById

```
@GetMapping("/{userId}")
@PreAuthorize("hasRole(\"'USER'\")")
public org.springframework.http.ResponseEntity<UserDTO> getUserById(@PathVariable
                                                                    Long? userId)
```

3. Obtiene un usuario por ID. GET /api/users/{userId}

### getUserByEmail

```
@GetMapping("/email/{email}")
@PreAuthorize("hasRole(\"'USER'\")")
public org.springframework.http.ResponseEntity<UserDTO> getUserByEmail(@PathVariable
                                                                    String? email)
```

4. Obtiene un usuario por email. GET /api/users/email/{email}

### updateUser

```
@PutMapping("/{userId}")
@PreAuthorize("hasRole(\"'USER'\")")
public org.springframework.http.ResponseEntity<UserDTO> updateUser(@PathVariable
                                                                    Long? userId,
                                                                    @Valid @RequestBody
                                                                    @Valid UserCreateRequestDTO request)
```

5. Actualiza un usuario existente. PUT /api/users/{userId}

### updateUserProfile

```
@PutMapping("/{userId}/profile")
@PreAuthorize("hasRole(\"'USER'\")")
```

```
public org.springframework.http.ResponseEntity<UserDTO> updateUserProfile(@PathVariable
                                                                    Long ↗ userId,
                                                                    @RequestBody
                                                                    UserUpdateRequestDTO request)
```

6. Actualiza el perfil del usuario (versión flexible). PUT /api/users/{userId}/profile

## deleteUser

```
@DeleteMapping("/{userId}")
@PreAuthorize("hasRole(\"ADMIN\")")
public org.springframework.http.ResponseEntity<Void ↗> deleteUser(@PathVariable
                                                                    Long ↗ userId)
```

7. Elimina un usuario. DELETE /api/users/{userId}
