Enum Constant Details

EQUAL

public static final [ExpenseSplitType](#) EQUAL

MANUAL

public static final [ExpenseSplitType](#) MANUAL

PERCENTAGE

public static final [ExpenseSplitType](#) PERCENTAGE

CUSTOM

public static final [ExpenseSplitType](#) CUSTOM

Method Details

values

public static [ExpenseSplitType](#)[] values()

Returns an array containing the constants of this enum class, in the order they are declared.

Returns:

an array containing the constants of this enum class, in the order they are declared

valueOf

public static [ExpenseSplitType](#) valueOf([String](#) name)

Returns the enum constant of this class with the specified name. The string must match *exactly* an identifier used to declare an enum constant in this class. (Extraneous whitespace characters are not permitted.)

Parameters:

name - the name of the enum constant to be returned.

Returns:

the enum constant with the specified name

Throws:

[IllegalArgumentException](#) - if this enum class has no constant with the specified name

[NullPointerException](#) - if the argument is null

getDisplayName

public [String](#) getDisplayName()
