

Package `com.mapmyjourney.backend.repository`

Interface `UserRepository`

All Superinterfaces:

`org.springframework.data.repository.CrudRepository<User, Long↗>`,
`org.springframework.data.jpa.repository.JpaRepository<User, Long↗>`,
`org.springframework.data.repository.ListCrudRepository<User, Long↗>`,
`org.springframework.data.repository.ListPagingAndSortingRepository<User, Long↗>`,
`org.springframework.data.repository.PagingAndSortingRepository<User, Long↗>`,
`org.springframework.data.repository.query.QueryByExampleExecutor<User>`,
`org.springframework.data.repository.Repository<User, Long↗>`

@Repository
public interface **UserRepository**
extends `org.springframework.data.jpa.repository.JpaRepository<User, Long↗>`

Method Summary

- All Methods
- Instance Methods
- Abstract Methods

| Modifier and Type |
|--|
| Method |
| Description |
| boolean |
| existsByEmail (String [↗] email) |
| Verifica si existe un usuario con ese email. |
| Optional [↗] <User> |
| findByEmail (String [↗] email) |
| Busca un usuario por su email. |

Method Details

| |
|--------------------|
| findByEmail |
|--------------------|

`Optional<User> findByEmail(String email)`

Busca un usuario por su email.

Parameters:

email - el email del usuario

Returns:

Optional con el usuario si existe

existsByEmail

`boolean existsByEmail(String email)`

Verifica si existe un usuario con ese email.

Parameters:

email - el email a verificar

Returns:

true si existe, false si no
