Enum Constant Details

USER

```
public static final UserRole USER
```

ADMIN

```
public static final UserRole ADMIN
```

Method Details

values

```
public static UserRole[] values()
```

Returns an array containing the constants of this enum class, in the order they are declared.

Returns:

an array containing the constants of this enum class, in the order they are declared

valueOf

```
public static UserRole valueOf(String name)
```

Returns the enum constant of this class with the specified name. The string must match *exactly* an identifier used to declare an enum constant in this class. (Extraneous whitespace characters are not permitted.)

Parameters:

name - the name of the enum constant to be returned.

Returns:

the enum constant with the specified name

Throws:

IllegalArgumentException - if this enum class has no constant with the specified name

NullPointerException - if the argument is null

getDisplayName

```
public String getDisplayName()
```
