Method Details

values

public static TripMemberRole[] values()

Returns an array containing the constants of this enum class, in the order they are declared.

Returns:
an array containing the constants of this enum class, in the order they are declared

valueOf

public static TripMemberRole valueOf(String name)

Returns the enum constant of this class with the specified name. The string must match *exactly* an identifier used to declare an enum constant in this class. (Extraneous whitespace characters are not permitted.)

Parameters:
name - the name of the enum constant to be returned.

Returns:
the enum constant with the specified name

Throws:
IllegalArgumentException - if this enum class has no constant with the specified name

NullPointerException - if the argument is null

getDescription

public String getDescription()

hasPermission

public boolean hasPermission(TripMemberRole required)

Verifica si este rol tiene un permiso específico.
